

TECHNICAL DATA SHEET No. 5

FIAT PUNTO BRAKE SHOES - BW1411 & BW1431

The Original Equipment brake shoe assemblies supplied for the above vehicles (OE Ref. 9948373 & OE Ref. 9948772) feature an automatic cable latching device. This cable latching device has been developed by Automotive Products Italy and we understand that a patent has been registered and is still in force.

Brakeworld fully respects the above patent and will not market any product that may be in conflict with this.

However, the equivalent brake shoe references, BW1411 & BW1431, supplied by Brakeworld, are interchangeable with the above OE references, although an alternate handbrake lever design is used which utilises a different principle for mounting the cable.

PLEASE NOTE THAT THE BRAKEWORLD BRAKE SHOES FULLY MEET THE REQUIREMENTS FOR BOTH FUNCTIONALITY AND RELIABILITY, AND ARE A SUITABLE REPLACEMENT PART FOR THE OE BRAKE SHOES.
